

<b>Genie Web Server Requirements</b>		
Genie and WebPublisher PRO must be installed on the same server. Please see the WebPublisher PRO server requirements later in this document.		
Genie v3.4 is supported for use with WebPublisher PRO v13, v12, or v11. If WebPublisher PRO v13 is installed <i>before</i> Genie, the Service Pack for Genie (v3.4 SP1) is required. WebPublisher PRO v11 is not recommended because it is not supported on 64-bit servers or Windows Server 2008 (32-bit).		
<b>Genie Client Web Browser Requirements</b>		
<b>Supported Web Browsers</b>	<b>Operating System</b>	<b>Notes</b>
MS Internet Explorer 6.0 or later	MS Vista MS Windows 7 MS XP with SP2	The ScriptX ActiveX control must be installed on the client if there is a need to print labels and/or specific reports. This is not a pre-installation requirement, as this can be installed when it is first required. (The ScriptX software is installed with Genie.)
Mozilla Firefox 3.0 or later, for search/display only	same as above	ScriptX is not supported for use with browsers other than IE.
<b>Notes:</b>		
Enable JavaScript and cookies.		
Recommended screen resolution: at least 1024 x 768.		

<b>Inmagic DB/TextWorks (non-SQL platform) v13 System Requirements</b>	
<b>Operating Systems</b>	
Windows Server 2008 SP2 (32-bit or 64-bit)	
Windows Server 2008 R2 (64-bit)	
Windows 7 (32-bit or 64-bit)	
Windows Vista SP2 (32-bit or 64-bit)	
Windows Server 2003 SP2 (32-bit or 64-bit), deprecated	
Windows Server 2003 R2 (32-bit or 64-bit), deprecated	
Windows XP PRO SP2 (or newer)	
<b>Note:</b> Installation of the software on a Domain Controller is not supported.	
<b>Inmagic DB/SearchWorks Run-time software (included with DB/TextWorks)</b>	
<b>Operating Systems</b>	
Windows 7 (32-bit or 64-bit)	
Windows Vista SP2 (32-bit or 64-bit)	
Windows XP PRO SP2 (or newer)	
<b>Notes</b>	
The Run-time software is a standalone, search only version of DB/TextWorks that allows outside users to search a textbase.	
The Run-time software is not intended for network use. It may be installed on a single machine, not a server.	
Each copy of the Run-time software requires exclusive access to a single textbase and permits only one instance of the software to run at a time.	

<b>Inmagic DB/Text WebPublisher PRO (non-SQL) v13</b>		
<b>Server Requirements</b>		
Microsoft ASP.NET 3.5 SP1		
Microsoft XML Core Services 4.0 SP2 (will be installed if not already present)		
ISAPI (recommended) or CGI		
Do not install WebPublisher PRO on a server hosting SharePoint.		
<b>Supported Operating Systems</b>	<b>IIS</b>	<b>Notes</b>
Windows Server 2008 SP2 (32-bit or 64-bit)	IIS 7.0	<ul style="list-style-type: none"> <li>• IIS 6 compatibility (subcomponent of IIS 7) required</li> <li>• ISAPI is required for editing records. If you use CGI, the CGI extension must be installed, and editing is not supported.</li> <li>• IIS 7.0 WindowsAuthenticationModule and/or BasicAuthenticationModule must be installed before WebPublisher PRO if you will use Windows (Single Sign On) or Basic authentication to access the website. See <a href="http://technet.microsoft.com/en-us/library/cc733010(WS.10).aspx">http://technet.microsoft.com/en-us/library/cc733010(WS.10).aspx</a>.</li> </ul>
Windows Server 2008 R2 (64-bit)	IIS 7.0	<ul style="list-style-type: none"> <li>• Same as above</li> </ul>
Windows Server 2003 with SP1 or later (32-bit)	IIS 6.0	<ul style="list-style-type: none"> <li>• Deprecated (currently supported, but we expect to remove or end support in the future)</li> </ul>
Windows Server 2003 R2 (64-bit)	IIS 6.0	<ul style="list-style-type: none"> <li>• Deprecated (currently supported, but we expect to remove or end support in the future)</li> <li>• 32-bit application pools must be enabled on IIS.</li> <li>• For help on getting the .NET framework to work, see <a href="http://support.microsoft.com/kb/911720">http://support.microsoft.com/kb/911720</a>.</li> </ul>
<b>Client Browser Support</b>		
Microsoft Internet Explorer 7, 8		
Mozilla FireFox 3.6.x		
Safari 5 and later		
Google Chrome 10 and later
